Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Applicant presented a claim amendment that would clarify the independent claims to require a selection of a touch sensitive button via a spatial map, to display the related menu. The Examiner noted the growing similarities between the present application and copending 10/713,224, and noted that further consideration regarding a possible double patenting rejection would be required. The Examiner noted that the proposed amendment appears to overcome the prior art of record but further search and/or consideration is required. Applicant's Representative also proposed several dependent claims with further dependent features to clarify distinctions.
